

CODE	<b>Art. 2233</b>
TRADE NAME	BLACK CATRAMINA
PRODUCT TYPE	BITUMINOUS PAINT

## Technical characteristics

It is a solvent-based bituminous paint with high anchorage, dustproof, waterproof and great for saturating the porosity of the concrete.

The product can be applied before laying bituminous membranes on flat, curved, pitched or vertical, metal structures, gutters, canals, tanks, sheet metal, to protect basements in iron, wood, cement.

## Applications

The product is ready for use. Mix before using. If dilutions are required, use common nitro and synthetic diluents. Apply by spraying, brush, on dry surfaces, clean and without friable parts. Avoid extreme heat (>35°C) and cold (<5°C) during application. Do not apply Black Catramina on very hot surfaces because it would be an overly accelerated painting process with negative consequences on cohesion and on the adhesion of the products on the support.

## Important

Avoid contact and inhalation of vapors in handling. Keep away from heat, flames and sparks. Store in a cool, dry place.

Always conduct a preliminary test before using. Use the product according to good working practices, however, avoiding dispersing the product or packaging in the environment.

## Safety data

Refer to the Material Safety Data Sheet

Chemical and Physical Property	
Physical State and colour	Black liquid
Odour	Characteristics
Flash point	< 23 °C
Relative density	0,93 - 1,10 c.a. g/cm <sup>3</sup>
Dry to touch	*30 ± 10min.
Drying time	*100 – 140 min.
Water solubility	Insoluble
Viscosity	120 ± 30 sec (TF4 a 20°C)
Yield	4 - 5 mq/l depending on the absorption of the support

\*Expressed times may be longer or shorter with the decrease or increase in temperature
