

CODE	Art. 3204
TRADE NAME	CEMENTO RAPIDO
PRODUCT TYPE	CEMENT

Technical characteristics

The product is used to manufacture plasters, concretes and mortars of various kinds. Also suitable to perform grouting floors, ceramics, sanitary ware etc.. Given the fast setting, cement is great for quick emergency action. The product is suitable for use both internal and external.

Applications

How to use:

To make mortar: Mix 1 kg of product with 2 or 3 kg of washed sand, immediately add the water and mix until desired consistency is achieved. The substrates must be clean, moistened before application. For filling: Prepare the dough by adding about 2 volumes of dust to a volume of clean water, mix thoroughly with a trowel to obtain a homogeneous mixture free of lumps and to apply compacting with a rubber spatula.

Important

Prepare only the amount of product that can be used within 2 hours. Do not add water to the mixture and do not use the material already in the socket. Do not stress the material being applied before 24/48 hours. Do not use below +5 ° C or frozen if they are possible within 48 hours. With high-temperature conditions, wind or sunlight moisten the material being applied for the first 24/48 hours. Wash the equipment used with water before it starts to set. Dispose of waste material in accordance with the rules in force at the place of use. Store in cool, dry place in its original packaging intact. Use within 9 months from date of packaging. Product conforms to the DM 10/05/2004

Safety data

Refer to the Material Safety Data Sheet

Chemical and Physical Property	
Physical State and colour	Grey solid
Mixing ratio	With 23-25 parts water 100 parts of powder
Compressive strength 15 min	6 N/mm ²
Compressive strength 1 h	9 N/mm ²
Compressive strength 3 h	15 N/mm ²
Compressive strength after 28days	40,5 N/mm ²
Temperature resistance	From -30°C to +90°C
