

CODE	Art. 1879
TRADE NAME	PETROLIO LAMPANTE NEW
PRODUCT TYPE	SOLVENT

Technical characteristics

Mixture of hydrocarbons obtained from the distillation of petroleum fractions, is used for illumination, for domestic use, as a degreasing agent for surfaces and is an excellent solvent for waxes. Also used for dilution of synthetic and oleosyntetic paints, it gives to the same maximum dilation and gloss.

Thanks to the high solvent power can also be used to clean spray guns, brushes and dirty paint tools. For its purity characteristics the product is stable and does not deteriorate. The rate of evaporation of the product is low-medium.

Applications

Mix the paint until his reach the fluidity desired: with an optimal dilution will enhance the brilliance and distension of the paint.

Important

Always make a preliminary test before use. Use the product according to good practice working, however, to avoid dispersing the product or packaging in the environment.

Chemical and Physical Property	
Phisical state	Liquid
Colour	Colourless
Odour	Characteristics
Flash point	80°C
Relative density	0,812 ± 0,02 kg/l
Boiling point	190°C
Auto-flammability	> 220°C
