

CODE	<b>Art. 1800</b>
TRADE NAME	DILUENTE SINTETICO
PRODUCT TYPE	SYNTHETIC THINNER

## Technical characteristics

Formulated with highly selected raw materials, it is used for the dilution of synthetic and oily synthetic enamels thanks to its slow evaporation, giving it brilliance and dilation to the paint product. Thanks to the high solvent power, the synthetic diluent can also be used to clean guns, brushes and dirty paint tools. For its purity, the product is stable and does not deteriorate.

## Applications

### To dilute:

Dilute the paint until it reaches the desired fluidity: with an optimal dilution will enhance the gloss and the distention of the paint.

### To clean:

Use this when requesting the cleaning of surfaces, paintbrushes and spray guns dirty.

## Important

Always perform a preliminary test before using. Use according to good working practices, however, to avoid dispersing the product or packaging in the environment.

Chemical and Physical Property	
Physical state	Liquid
Colour	Colourless
Odour	Characteristic
Flash point	c.a. 37°C
Boiling range	95°C – 180°C
Relative density	c.a. 0,925 ± 0,02 kg/l
Water solubility	Insoluble
